

PROJECT NAME
ORDERING #

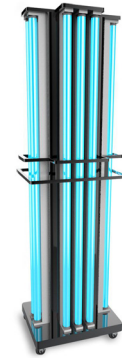

Sanitize offices, classrooms, daycares, commercial kitchens, break rooms, waiting rooms, production areas, and much more—safely and quickly—using Germicidal UVC Towers. Powerful, effective, and easy to use, our UVC disinfection towers are an excellent supplement for manual cleaning, without significantly increasing labor and consumables costs.

### KEY SPECIFICATIONS

Input Power	160W, 400W
Input Voltage	120VAC
Wavelength	254 nm
Dimensions	Standard Tower: 10" wide x 24.5" deep x 50" tall Deluxe Tower: 31.5" wide x 24.5" deep x 51" tall
Weight	Standard Tower: 35 lbs Deluxe Tower: 55 lbs

*Standard Tower includes four 40W UVC lamps*

*Deluxe tower includes ten 40W UVC lamps, plus four casters for easy movement*

### ORDERING

Model Root	Wattage	Unit Type	Options
<b>LLT-UVC</b>	<b>S160</b> - Standard, 160W <b>D400</b> - Deluxe, 400W	<b>TWER</b> - Tower	<b>BLANK</b> - None

**Safety Note:** UVC radiation can cause skin burns and eye injuries that may appear hours after exposure has occurred. Avoid direct skin exposure to UVC radiation and never look directly into a UVC light source, even briefly. For protection, many UVC lamps automatically shut off when approaching motion is detected. For lamps that require an operator, such as handheld UVC sanitizers, we recommend ANSI Z87.1-1989 eye/face protection, long pants and sleeves, and disposable nitrile gloves.

\*Note: You may perceive a sulfuric odor after UVC disinfection. This is a normal result of irradiating keratin- and cysteine-containing dust particles in the air (generally dead skin and hair cells). This residual odor does not pose a health hazard (more info). If you experience a smell, we recommend opening windows or otherwise ventilating the area after disinfection.
